

Somewhere

One great video introducing yourself and your skills can change your life.

This is how you set yourself apart from other applicants and we will use this video to advertise your talents to employers all over the world!

Applicants who work with us often get jobs with 20–50% higher pay.

Spending 20–30 minutes making this video is the most valuable thing that you can do in your job search.

HOW TO RECORD A GREAT VIDEO

1. Our goal is maximum clarity and resolution. Please **use the best camera** that you have! A mobile phone is often better resolution than a computer webcam. Try using your mobile phone first.
2. Record in **landscape mode** (with the phone on its side)
3. **Do not read a script**, and be natural. Making a few mistakes or stutters is totally okay! Do NOT use Chat GPT to create a script (this is a major turnoff to potential employers)
4. Make sure natural **light is on your face, not behind you**. If a window or bright light is behind you it will ruin the video quality.
5. **Do not mention your current employer or your last name for privacy reasons.**
6. Record indoors in a quiet place.
7. Wear **professional clothing** while filming.
8. Do not use a blurred background or filter of any kind.
9. If possible, a neutral background behind you is great. If not possible, make sure to clean up and remove any clutter.
10. Bring a lot of **energy while filming** (This matters a lot!)
11. Always introduce yourself at the beginning of your recording (i.e Hi, my name is Alex and I'm a CPA with 5 years of experience, before you share more about your background and professional qualifications)
12. **Keep it short:** 1 minute is ideal. 2+ minutes is too long.
13. Remember: You are speaking to potential employers. It is good to brag about yourself by sharing more about all of the impressive things that you have done in your career.
