

Full-Funnel Content Syndication & High-Velocity Distribution Engine

Turning core authority pillars (founder keynotes, pillar research & YouTube videos) into 200+ monthly multi-channel publishing assets. Grounded in HubSpot Content Syndication principles: 100% technical canonical integrity (`rel="canonical"`), embeddable visual syndication, zero creative friction, and closed-loop MQL attribution.

Operator: Jezreel Dave Leybag **LinkedIn:** [linkedin.com/in/jezreel-dave-leybag](https://www.linkedin.com/in/jezreel-dave-leybag)

Focus: B2B & Personal Growth Thought Leadership Syndication

Core Stack: Notion • Asana • Metricool • Buffer • Canva • Premiere • CapCut • HubSpot CRM

Availability: Full-Time (US EST / CST / SAST Ready)

✗ WITHOUT SYNDICATION ENGINE (AD-HOC REPOSTING)

- ✗ **SEO Cannibalization:** Duplicate content indexed by Google, outranking root domain.
- ✗ **Founder Burnout:** 15+ hours spent manually formatting social posts and video snippets.
- ✗ **Paid Ad Drain:** ~\$4,200/mo spent on native PPC (Taboola/Outbrain) with zero organic backlink equity.
- ✗ **Vanity Metrics:** Zero UTM tracking or CRM attribution; unknown pipeline impact.

✓ WITH JEZREEL'S SYNDICATION ENGINE (AUTOMATED MACHINE)

- ✓ **100% SEO Safety:** Strict 14–21 day indexing quarantine and verified `rel="canonical"` tags.
- ✓ **Zero Founder Friction:** 1 single 8-min anchor generates 200+ multi-platform publishing assets.
- ✓ **Compounded Backlink Equity:** 26+ monthly high-authority backlinks gained via embeddable visual kits.
- ✓ **Closed-Loop MQLs:** Direct lead magnet handoffs tracked into HubSpot CRM via UTM tokens.

The Philosophy: Process Over Personality

⚡ DISTRIBUTION MACHINE

“Great creative content is useless if the distribution engine breaks. I am not an aspiring influencer or creator looking for personal fame. My role is to operate as the quiet, disciplined execution engine behind the founder and Marketing Leadership—ensuring every script, podcast, and article is safely syndicated across web publications, repurposed into high-dwell social derivatives, and tracked to closed-won revenue without missing a single beat.”

1. The 3-Tier Content Syndication Ecosystem (HubSpot Framework)

How core content is scaled across high-authority web publications, embeddable visual assets, and social channels.

CORE PILLAR

Original Anchor Asset

8–12 min video, keynote or pillar blog post on host domain

TIER 1: WEB SYNDICATE

Canonical Web Republishing

Medium, LinkedIn Pulse, Substack, Business2Community with `rel="canonical"`

TIER 2: VISUAL SYNDICATE

Embeddable Visual Kits

7-slide Canva carousels & infographics for partner backlink embeds

TIER 3: SOCIAL VELOCITY

High-Dwell Social Cuts

LinkedIn long-form, 9:16 vertical shorts, and viral X/Twitter threads

TIER 4: AUTOMATED FEEDS

RSS & Feed Aggregation

Automated sitemap syndication to Flipboard, Google News & aggregators

2. Technical SEO & Canonical Protection Protocol

The 4-stage engineering safeguard to ensure syndication drives high domain authority without duplicate content penalties.

Google-Compliant Syndication Workflow

✓ SEO PROTECTED

PHASE 01: ORIGIN LOCK

Host Domain Publishing

Article is published first on the client's root domain with full Schema markup (Article, author, datePublished).

PHASE 02: QUARANTINE

14-Day Indexation Hold

Syndication is strictly held for 14–21 days until Google Search Console confirms Googlebot has indexed and attributed original authority to the client URL.

PHASE 03: CANONICAL TAG

Cross-Domain Canonical

Republished copies on Medium, partner blogs, or Substack inject the client URL into the `rel="canonical"` tag, directing all PageRank to root.

PHASE 04: ATTRIBUTION

Editorial Attribution

Clear editorial statement at top/bottom: *"This article was originally published on [Brand]. Republished with permission."* with a direct do-follow backlink.

```
// Canonical tag injected on Medium, LinkedIn Articles, and syndication partners:  
<link rel="canonical" href="https://content-syndication-portfolio.vercel.app/" />  
// Fallback for partner CMS lacking cross-domain canonical support:  
<meta name="robots" content="noindex, follow" />
```

● LIVE SEO VERIFICATION SPECIMEN

Published Canonical Syndication on Medium

PROJECTED PIPELINE / CONTENT VALUE

\$6,150 / mo

Replaces ~\$4,200/mo in paid native ad syndication (Taboola/Outbrain CPC equiv.)

4. Live Case Specimen: Personal Growth & High-Performance

Subject: “The Frictionless Operator: How High Performers Eliminate Decision Fatigue”

Live Published Case Specimen

Verified live in production across LinkedIn and Medium.

 [View Live on LinkedIn ↗](#)

 [View Live on Medium ↗](#)

Original Pillar Anchor Excerpt:

“Most people think burnout comes from working too hard. It doesn’t. Burnout comes from cognitive drag—holding 40 micro-decisions in your head before 10 AM. If you want to scale your output without collapsing, you don’t need more time. You need standard operating procedures for your life: pre-deciding your morning, batching communication, and eliminating open mental loops...””

Engineered for Dwell-Time & Above-The-Fold Hook Truncation

[Open Live Post on LinkedIn ↗](#)

Burnout isn't caused by working 12 hours a day.

It's caused by making 40 micro-decisions before 10 AM.

Most founders and operators obsess over time management. But time is flat—you get 24 hours whether you are energized or completely drained.

What high performers actually manage is cognitive load.

Here is the 3-step “Frictionless Operator” framework to kill decision fatigue (swipe through the slides below for the full breakdown):

1. Pre-Decide the First 90 Minutes

Never sit at your desk in the morning asking, “What should I work on today?” That single question burns 30% of your executive focus before noon. That decision belongs at 5 PM yesterday.

2. Eliminate Open Mental Loops

An uncompleted task or unanswered message doesn't just sit in your inbox—it rents space in your working memory. If it takes under 2 minutes, kill it immediately. If it takes longer, lock it into a calendar block.

3. SOP Every Repeatable Task

When routine work is documented into simple 3-step checklists, your brain operates on autopilot, preserving creative energy for strategic breakthroughs.

Which of these 3 bottlenecks is currently eating your productive energy?

(P.S. I put together our 1-page Daily Friction Audit & Shutdown SOP template in Notion. Dropped the free link in the first comment below 📌)

5. Partner Prospecting, UTM Attribution & CRM Routing

How syndication partners are sourced and every click is attributed to pipeline revenue in HubSpot.

Footprint Prospecting & Closed-Loop Tracking

LEAD ENGINE

🔍 Advanced Partner Prospecting Operators:

Used to locate authoritative publications that naturally accept syndicated articles:

```
"personal growth" + inurl:blog + "originally published on"
```

```
"high performance" + "republished with permission"
```

```
inurl:category/guest-post + "founder"
```

🔗 Standardized UTM Tracking Matrix:

Applied to all CTAs for closed-loop attribution into Google Analytics 4 & HubSpot CRM:

```
https://client.com/friction-audit?  
utm_source=medium_syndication&  
utm_medium=editorial_canonical&  
utm_campaign=burnout_q4&  
utm_content=notion_audit_cta
```

📅 6. Distribution Operations & Master Content Calendar

How 200+ monthly assets across web publications and social channels are tracked, scheduled, and verified.

Live Pipeline Matrix (Notion / Asana Architecture)

OPERATIONAL CONTROL

DATE / SLOT	CORE ASSET	DESTINATION	FORMAT & SPECS	STATUS	QC & VERIFICATION
Mon, Oct 5 • 8:00 AM EST	Episode #42: Burnout Myths	LinkedIn Feed	Structured Long-Form + Carousel ↗	Published (Live)	✓ View Live Post ↗
Mon, Oct 5 • 11:30 AM EST	Episode #42: 3 Traps	Instagram / TikTok	9:16 Video Reel (42s, burned-in captions)	Published	✓ Passed (100%)
Tue, Oct 6 • 9:00 AM EST	Framework: The Friction Audit	LinkedIn / IG	7-Slide Document Carousel (PDF) ↗	Published (Live)	✓ Swipe Live Carousel ↗
Tue, Oct 6 • 2:00 PM EST	Key Takeaways Thread	X (Twitter)	6-Post Thread + YouTube Backlink CTA	Scheduled (Metricool)	✓ Passed (100%)
Wed, Oct 7 • 10:00 AM EST	Episode #42: Full Article	Medium / Publication	Canonical Web Syndicate + Attribution ↗	Published (Live)	✓ Canonical Verified (Live) ↗
Thu, Oct 8 • 11:00 AM EST	Episode #43: High-Leverage Habits	YouTube / Shorts	16:9 Long-Form + 3x 9:16 Shorts	In Final QC	Pending Aspect Check

📋 7. The 16-Point Technical & Syndication Quality Control (QC) Protocol

The operational and SEO checklist applied to every single piece of content before it goes public.

✓ **Aspect Ratio Rigor:** 9:16 for Reels/Shorts/TikTok; 4:5 or 1:1 for LinkedIn/IG feeds; 16:9 for YouTube.

✓ **UI Safe Margins:** 9:16 text kept away from bottom captions and right-side interactive icons (likes/shares).

✓ **Above-The-Fold Hook Check:** First 2–3 lines formatted to hook reader before the “...see more” truncation click.

✓ **External Link Hygiene:** LinkedIn external links placed in first comment or featured section to protect algorithm reach.

✓ **Brand Typography & Colors:** Strict adherence to brand kit hex codes, font weights, and spacing in Canva.

✓ **Audio Sync & Caption Timing:** 100% accurate subtitle timing without text clipping or overlapping words.

✓ **Tagging & Mention Accuracy:** Verified spelling of all featured collaborator handles across respective platforms.

✓ **Hashtag Taxonomy:** 3–5 curated, high-relevance hashtags rather than generic or algorithmic spam blocks.

✓ **Carousel Pagination:** Numbered slides (e.g. 01/07) with directional arrows guiding continuous swipes.

✓ **CTA Alignment:** Clear single call-to-action per post (Comment, Save, Share, or Click) avoiding message confusion.

✓ **Asset Tagging & Archival:** All final exported files renamed using standard syntax and archived in Notion/Drive.

✓ **Time-Zone Sync:** Scheduled to target audience peak activity windows (US Eastern & Central business hours).

✓ **Canonical URL Verification:** External syndication URLs verify active `rel="canonical"` pointing to root origin.

✓ **14-Day Indexation Clearance:** Confirmed original post is indexed in Google Cache before external syndication release.

✓ **Editorial Attribution Signature:** Standardized disclaimer and do-follow link placed in republished article body.

✓ **UTM Parameter Audit:** Verified source, medium, and campaign tokens test successfully in Google Analytics 4.

Ready to Power Your Content Distribution Engine

100% dedicated to operational excellence, zero creative friction, and the relentless discipline required to syndicate high-volume personal growth and B2B thought leadership content.
